---

## CLASSROOM PROJECTS

### Amazon home page design

Designing an Amazon-like homepage using, HTML provides the structure, CSS ensures the visual appeal and layout consistency, while JavaScript adds interactivity and functionality such as dynamic content loading and user interaction.

### Election voting machine design

HTML structures the layout and content, CSS styles ensure a clear and intuitive design, and JavaScript adds functionality such as candidate selection, ballot submission, and result display.

### Snake game

Building a snake game project not only strengthens your understanding of JavaScript programming and DOM manipulation but also allows for creativity in design and gameplay mechanics.

### Resturant Billing page

It's a rewarding project that can be expanded with additional features like order history, discounts, or integration with backend systems for further functionality.

### Tic-tac-toe game

A Tic Tac Toe game project is an excellent way to reinforce foundational web development skills while exploring the complexities of interactive game design and user interface development.
